ROM TIP & PRIMARY CRUSHER

SAG AND BALL MILL

SAG MILL FEED CONVEYOR

C/o Maitland Limited  
Suite 510, 5th floor Barkly  
wharf  
Le Caudan Waterfront,  
Port Louis, Mauritius

The plant was constructed in 1999 and upgraded in 2002. It was well maintained during its life and was shut down in 2014 as a result of depletion of the resource.

The previous owner took extensive care to maintain the plant condition due to its possible relocation to a new operation within the group.

**The plant has already been dismantled, packaged and stored, ready for relocation anywhere.**
